PROFESSIONAL SUMMARY

Software QA Engineer with hands-on experience in large-scale e-commerce and B2B SaaS platforms. Skilled in test automation frameworks, API testing, UI testing, and fraud detection systems, with a track record of building comprehensive test suites across multiple regions and tech stacks. Experienced in BDD methodologies, CI/CD integration, and load testing for high-traffic periods. A collaborative team player contributing to test strategy discussions and ensuring product quality across functional, regression, journey, and acceptance testing.

EDUCATION

Bachelor of Computer Engineering

2019 – 2023

Istanbul University-Cerrahpaşa

Istanbul, Turkey

- Cyber security intern at istecenter
- Member of cyber security club and computer club

PROFESSIONAL EXPERIENCE

Software QA Engineer

Mar 2026 – Present

Insider

Istanbul, Turkey

- Developed and maintained automated test suites for a B2B SaaS customer engagement platform using Python and Selenium WebDriver, covering OnSite analytics, web push notifications, and campaign management modules.
- Designed and executed functional, regression, and acceptance tests for multi-tenant web application features, validating business logic and data consistency across partner environments.
- Managed test cases and test plans on BrowserStack Test Management, maintaining comprehensive test coverage and traceability across sprint cycles.
- Performed end-to-end testing of attribution and conversion tracking flows, verifying event-driven data pipelines and cross-channel attribution logic.
- Collaborated with cross-functional teams during story kick-off meetings to define test scenarios, identify edge cases, and ensure quality standards for new feature releases.
- Utilized isolated staging environments with namespace-based routing for feature-level testing and fix verification.

Technologies: Python, Selenium WebDriver, BrowserStack, Git, GitLab, JIRA, Confluence

Software Developer in Test

Jul 2023 – Feb 2026

Trendyol - Part of Alibaba Group

Istanbul, Turkey

- Developed and executed automated test cases at various levels of the testing pyramid using Java, JavaScript, and Python; implemented automated testing frameworks and integrated them into the CI/CD pipeline utilizing Agile methodologies.
- Applied Behaviour Driven Development (BDD) approach using Cucumber/Gherkin for clear and maintainable test scenarios.
- Performed load and performance testing to ensure system scalability and availability for high-traffic campaign periods.
- Automated UI testing using Cypress, Selenium, and Playwright to enhance user experience and ensure cross-browser compatibility.
- Developed contract tests for .NET and Go projects while maintaining close collaboration with cross-functional teams.
- Executed various test types including functional, regression, journey, and acceptance testing; reported bugs and tracked defects following SDLC principles.

Technologies: Java, JavaScript, Python, Cucumber, Gherkin, Cypress, Selenium, Playwright, JMeter, Maven, TestNG, JUnit, Pact, Git, GitLab, Grafana, Allure, Postman, Swagger

Manual Tester

Jan 2023 – Jun 2023

kolayfirsat.com

Istanbul, Turkey

Front-End Developer

Aug 2022 – Dec 2022

badiworks.com, sarjagi.com

Istanbul, Turkey

- Developed cross-platform applications using Flutter (iOS, Android, Web); performed API tests with Postman and executed UAT across multiple platforms.
- Built frontend pages using JavaScript, Svelte.js, and Node.js; implemented Mongoose schemas for database management.
- Gained experience in web scraping, bug fixing, UX improvements, and Agile-based unit testing workflows.

Technologies: Flutter, Dart, JavaScript, Svelte.js, Node.js, MongoDB, Postman, JIRA

TECHNICAL SKILLS

Java, Python, JavaScript, Dart, Golang, C, Gherkin, Selenium WebDriver, Cypress, Playwright, Appium, Cucumber, TestNG, JUnit, JMeter, Maven, Pact, BDD (Behavior Driven Development), Agile, REST APIs, Postman, Swagger, Git, GitLab CI/CD, Grafana, Allure, BrowserStack, JIRA, Confluence, React, Vue, Svelte.js, Node.js, Flutter, Tailwind CSS, Bootstrap, MongoDB, BigQuery, Neo4j
